

Diversity Equity and Inclusion

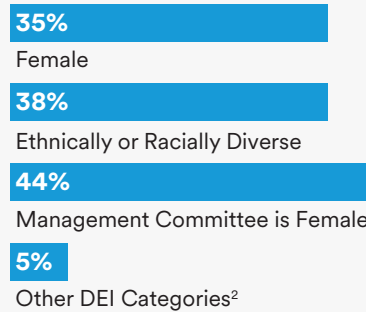

Our Approach

MetLife Investment Management’s (MIM) goal is to recruit, develop and retain a diverse workforce with a culture focused on ensuring all employees are engaged and active members of the organization. In doing so, we also strive for inclusiveness as we believe healthy debate of investment ideas requires fully engaged investment teams from diverse backgrounds. However, we don’t stop there. We also support diversity, equity and inclusion by having an impact on diverse, underrepresented communities through select investments.

All investments involve risks including the potential for loss of principle and past performance does not guarantee similar future results. Property is a specialist sector that may be less liquid and produce more volatile performance than an investment in other investment sectors. The value of capital and income will fluctuate as property values and rental income rise and fall. The valuation of property is generally a matter of the valuers’ opinion rather than fact. The amount raised when a property is sold may be less than the valuation. Furthermore, certain investments in mortgages, real estate or non-publicly traded securities and private debt instruments have a limited number of potential purchasers and sellers. This factor may have the effect of limiting the availability of these investments for purchase and may also limit the ability to sell such investments at their fair market value in response to changes in the economy or the financial markets.
